INSTRUMENTS

Environmental Policy Statement

As designers and manufacturers of geotechnical and structural monitoring instrumentation, Soil Instruments recognises the potential for environmental impact at every stage of our operations.

Soil Instruments is committed to complying with all relevant legislation & the prevention of pollution, and continual improvement of our environmental performance.

Soil Instruments is determined to incorporate good environmental practices into all aspects of our operations. To deliver on our commitment we shall:

- **Minimise** waste by re-using or recycling as far as possible.
- **Provide** an environmental management system and associated procedures that are relevant to the nature and scale of work undertaken.
- **Identify** the environmental aspects and impacts of our operations, in particular those which are governed by law and best practice.
- **Ensure** that staff are aware of the environmental management system, associated procedures, and the potential environmental impacts of their work activities and how these impacts are minimised.
- **Engage** employees, clients, contractors, and suppliers to achieve good environmental practices.

It is everyone's responsibility to limit our impact on our environment. Towards this, Soil Instruments' employees are responsible for complying with the environmental management system.

Tony Larkin

General Manager
